FROGGI ERC20i

FROGGI utilizes ERC-20i, an innovative token standard on the Base network that extends the capabilities of traditional ERC-20 tokens by incorporating inscriptions. These inscriptions allow each token to store unique seed data, enabling dynamic and unique digital artifacts to be rendered directly on the blockchain.

DYNAMIC & STABLE FROGGI

When you purchase $Froggi, your coins are automatically inscribed with the information to bring your Froggi to life. You can view your Froggi by entering your receiving address on Froggi.net, within community servers, or by connecting to the website directly.

RE-ROLLING & ADAPTING YOUR FROGGI

You can reroll your Froggi by either combining or splitting your Stable Froggi to return them into a Dynamic state. When in a Dynamic state, any balance change in whole numbers will generate a fresh image based on holder level.

You can then re-stabilize your Froggi by sending the number of tokens associated with the Froggi to a new address, or internally to the same wallet.

For instance, to stabilize "Dynamic Froggie 12345" you would send 12345 tokens to a new address, or internally to the same wallet. Dynamic tokens will always be sent first, unless an exact stable value is being sent.

KEEP OR CHANGE?

Unlike other ERC20i, Froggi does not keep you beholden to a base regenerator. While with other projects, you can transfer the same number of tokens to the same wallet in order to produce the same image, Dynamic Froggi are ever-changing, and if you decide to reroll your Froggi and chance one with different looks, the old one will be lost in place of the new.

LEVELS

FROGGI HELD	LEVEL	ANIMATED BODY / ANIMATED BG
999 or less	0 - Egg	100% / 0%
1000 - 2999	1 - Egg	100% / 5%
3000 - 9999	2 - Clean Froggi	5% / 5%
10000 - 29999	3 - Single* Trait Froggi	10% / 5%
30000 - 59999	4 - Double* Trait Froggi	20% / 5%
60000 - 119999	5 - Triple** Trait Froggi	25% / 25%
120000+	6 - Triple** Trait Froggi	100% / 100%

* 33% Chance Per Trait   **** 50% chance per trait**
